MATERIAL SAFETY DATA SHEET according to Regulation (EU) 453/2010
DEUREX® E – SERIES / EO – SERIES / EV 03

1. IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY

1.1. Product identifier
Trade names: DEUREX® E 06 K
DEUREX® E 07 K
DEUREX® E 08
DEUREX® E 09 K, E 09 P, E 09 A, E 0920 M, E 0925 M
DEUREX® E 10 G, E 10 K
DEUREX® E 11 G, E 11 K, E 11 F
DEUREX® E 12, E 12 K
DEUREX® E 13
DEUREX® E 18 G, E 18 K
DEUREX® EO 40 K
DEUREX® EO 42
DEUREX® EV 03

1.2. Relevant identified uses of the substance or mixture and uses advised against
Industrial use (Use category SU 3):
• Additive for paints and coatings, printing inks
• Lubricants for non-polar pigment concentrates (Polyolefin, Masterbatch)
• Plastics industry

1.3. Details of the supplier of the safety data sheet
DEUREX AG
Dr.-Bergius-Str. 8 – 12
D - 06729 Elsteraue
Tel.: +49(0)3441 / 8 29 29 29, Fax: +49(0)3441 / 8 29 29 28
Material-Safety@Deurex.com
www.Deurex.com

1.4. Emergency telephone number
Common poisons information centre of the Federal States
Mecklenburg-Western Pomerania, Saxony, Saxony-Anhalt and Thuringia.
D-99089 Erfurt
Tel.: +49(0)361-730730

2. HAZARDS IDENTIFICATION

2.1. Classification of the substance or mixture
Classification according to Regulation (EC) 1272/2008 [CLP]:
H phrases: None.
P phrases: None.

2.2. Label elements
Labelling according to Regulation (EC) 1272/2008 [CLP]:
None.

2.3. Other hazards
Based on the available evidence and when handled correctly, the product poses no danger for humans and the environment. The usual minimum standards for protective measures in the chemical industry must be observed. The substances do not meet the criteria for classification as PBT or vPvB ➔ Chapter 12.

3. COMPOSITION / INFORMATION ON INGREDIENTS

3.1. Substances
Chemical identity and characterisation:

4. FIRST AID MEASURES

4.1. Description of first aid measures
General: A hazard originated from the substance can occur during processing in hot state (risk of burning!)

Inhalation: Dust can irritate the respiratory tract. If breathing fumes, smoke and gases produced at higher temperatures, irritations of the respiratory system are possible. Remove the person to fresh air.

Skin: Rinse contaminated skin with plenty of water. Remove contaminated clothing and shoes. If symptoms persist, seek medical attention. Wash clothing before reuse. Thoroughly clean shoes before reuse. In case of contact with hot product apply first aid according to the degree of burn. Cool affected area with cool water. Do not remove solidified product from the skin. Remove clothing only if it does not stick to the skin. Cover affected areas with sterile Metalline fire cloth and provide medical treatment.
Eye: Foreign bodies cause mechanical irritation. Remove foreign bodies. In rinse eye, holding the eye lids apart, thoroughly under running water. In case of complaints seek medical advice.

Swallowing: Rinse the mouth with water. Remove affected person to fresh air. Keep person warm and calm. If material has been swallowed and the affected person is conscious, give small amounts of water to drink. If you experience nausea do not let the person drink more since vomiting can be dangerous. Do not induce vomiting unless directed by medical personnel. If symptoms persist, seek medical attention. Never infuse an unconscious person anything through the mouth. In case of unconsciousness, place in recovery position and seek immediate medical attention.

4.2. Most important symptoms and effects, both acute and delayed
No typical symptoms and effects known. If symptoms persist, seek medical advice.

4.3. Indication of any immediate medical attention and special treatment needed
No additional information available.

5. FIREFIGHTING MEASURES

5.1. Extinguishing media
Suitable extinguishing media:
Foam, dry chemical, carbon dioxide, water spray. Extinguishing media that suit the surrounding fire.

Unsuitable extinguishing media:
Water jet.

5.2. Special hazards arising from the substance or mixture
Take precautionary measures against electrostatic charges. Do not breath fumes of fire ➔ Chapter 10.

5.3. Advice for firefighters
Use approved compressed air breathing apparatus and wear firefighters protective clothing.

Do not empty fire water into drains. Fire residues and contaminated fire water must be disposed according to local regulations.
6. ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures
Personal protection measures / protective equipment ➔ Chapter 8.

6.2. Environmental precautions
Contain product mechanically for recovery or disposal. Solidify hot liquid product and collect it in clean containers for recycling or disposal. Do not empty into drains or surface water.

6.3. Methods and material for containment and cleaning up
Mechanical containment.
Observe Waste Act when disposing the waste and the contaminated material ➔ Chapter 13.

7. HANDLING AND STORAGE

7.1. Precautions for safe handling
Usual precautions when handling chemicals ➔ Chapter 8.
Keep away from ignition sources and take precautionary measures against electrostatic charges. The product is not dust explosive in the condition as received, however, prevent dust formation and raise of dust. In the presence of deposited combustible dust, risk of explosion is expected. When processing explosive dust may be accumulated, which can result in an explosive atmosphere. Good ventilation of the workplace, appropriate extraction and ventilation is required at the processing machines. Waxes are lubricants, danger of slipping!

7.2. Conditions for safe storage, including any incompatibilities
Storage conditions: Dry and at room temperature (10 – 25 °C).
Relative humidity < 80%.
Avoid direct sunlight and heat, moisture, water and other harmful influences ➔ Chapter 10.
Do not store together with food and feeding stuff.
Storage class: 11 – Flammable solids.
Fire class: B – Fires involving liquids or liquefiable substances.

7.3. Specific end use(s)
Risk of burn when handling with liquid (hot) product.
According to the formulation, the products do not contain:
- Heavy metals
- VOC
- Compounds listed in the Chemicals Prohibition Ordinance
- Substances according to Directive 2011/65/EU
- Substances according to Regulation (EC) 1907/2006 – Appendix XIV (SVHC listing)

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1. Control parameters
Components with critical values that require monitoring at the workplace:

<table>

<th>Description</th>
<th>Value</th>
<th>Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>---</td>
<td>---</td>
<td>- no information -</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

8.2. Exposure controls
Exposure limitation and controlling are workplace related and must be regulated by the user.

8.2.1. Appropriate technical safety devices
Ensure good ventilation - local exhaust. If this is not sufficient, wear respiratory protection.

8.2.2. Personal protective equipment
General protective and hygiene measures:
Usual precautions for handling chemicals. Do not eat, drink or smoke during work, and wear suitable protective clothing. Do not breathe dust. Wash hands before breaks. Remove contaminated clothing. After contact, clean skin with water and soap or use suitable cleanser. Do not use organic solvents.

Eye / Face protection:
Wear protective shield when handling hot material.

Skin / Body protection:
Wear protective gloves made of nitrile rubber. Wear heat-resistant gloves when handling hot material.

Wear protective clothing when handling hot material.
Waxes are lubricants, danger of slipping! Wear suitable footwear (antistatic work shoes).
Breathing protection:
If required, wear dust mask for fine particles when processing the product.

Wear respirator filter or breathing apparatus against vapours during thermal processing.

8.2.3. Limitation and controlling of environmental exposure
Information on environmental exposure ➔ Chapters 6, 7 and 12.

9. PHYSICAL AND CHEMICAL PROPERTIES

9.1. Information on basic physical and chemical properties

9.2. Other information
Dust explosion class
DEUREX E 09 A, E 0920 M, E 0925 M; ST 1 – Possibility of dust explosion

10. STABILITY AND REACTIVITY

10.1. Reactivity
Unknown.

10.2. Chemical stability
The product is stable under normal conditions and the set handling and storage conditions de-
scribed in Chapter 7.

10.3. Possibility of hazardous reactions
The product is not dust explosive in the condition as received. However, fine dust enrichment
can cause a dust explosion.

10.4. Conditions to avoid
Keep away from ignition sources and take precautionary measures against electrostatic
charges. Avoid dust formation and the raise of dust. Keep away from open fire and flames.

10.5. Incompatible materials
Strong oxidants.

10.6. Hazardous decomposition products
In case of combustion, CO, CO₂, flammable hydrocarbons, ammonia and smoke, as well as
traces of nitrous gases and nitrogen oxides can be produced.

11. TOXICOLOGICAL INFORMATION

11.1. Information on toxicological effects
Acute toxicity: LD₅₀ Oral rat >5000 mg/kg.
Irritating effects: No significant effects or critical hazards known.
Eye irritation: No significant effects or critical hazards known.
Sensitisation: No significant effects or critical hazards known.
Germ cell mutagenicity: No significant effects or critical hazards known.
Carcinogenicity: No significant effects or critical hazards known.
Reproductive toxicity: No significant effects or critical hazards known.
Results of CMR assessment: The substances do not meet the criteria for CMR category 1 or 2.

Further information: When the products are handled correctly, in compliance with the industrial hygiene and the inhalation of dusts and fumes is avoided, there is no health risk.

12. ECOLOGICAL INFORMATION

12.1. Toxicity
No significant effects or critical hazards known.

12.2. Persistence and degradability
Not easily biodegradable.

12.3. Bio-accumulative potential
No significant effects or critical hazards known.

12.4. Mobility in soil
No significant effects or critical hazards known.

12.5. Results of PBT and vPvB assessment
The substances do not meet the criteria for a classification as PBT or vPvB.

12.6. Other adverse effects
Water hazard class: Not hazardous to water.

13. DISPOSAL CONSIDERATION

13.1. Waste treatment methods
The producer of the waste must dispose the product according to its use, specific to the industry and the process, in cooperation with the local waste management company based on local waste disposal regulations and national regulations and laws. Contaminated packaging should be disposed according to local and national regulations and in consultation with the local waste management companies. For Europe, the waste producer sets the waste code in accordance with the European Waste List (Decision 2000/532/EC and Resolution 2014/955/EU). According to the present knowledge, the products are not regarded as hazardous waste as defined by EU Directive 2008/98/EC and regulation (EU) no 1357/2014.

14. TRANSPORT INFORMATION

Transport only in accordance with ADR for road haulage, RID for rail transportation, ADNR/IMDG for carriage by vessel/sea and IATA for carriage by air.

14.1. UN number
No hazardous materials

14.2. UN proper shipping name
No hazardous materials
14.3. Transport hazard class(es)
No hazardous materials

14.4. Packing group
No hazardous materials

14.5. Environmental hazards
No hazardous materials

14.6. Special precautions for user
→ Chapters 6 to 8

14.7. Transport in bulk according to Annex II of MARPOL73/8 and the IBC Code
Not applicable.

15. REGULATORY INFORMATION

15.1. Safety, health and environmental regulations / legislation specific for the substance or mixture

Labelling:
According to Regulation EC/1272/2008: None

International regulations:
Regulation (EC) 1907/2006
Regulation (EC) 1272/2008
 Directive 94/62/EC
 Directive 2008/98/EC
 Directive 2011/65/EC
 Directive 2012/19/EC
- respectively in the latest version incl. all amendment and corrections.

National regulations:
Compliance with applicable agreements, regulations and laws of the respective country.
Classification according to GefStoffV. (BRD): No.
Technical Instruction Air [TAum]: Not classified.
Information on employment restrictions: None.

International listing:
The contained substances are listed in the following inventory sheets:
DEUREX® E Series:
EINECS (Europe) TSCA (USA) DSL (Canada) AICS (Australia)
METI (Japan) ECL (South-Korea) IECSC (China) PICCS (Philippines)
NZIoC (New-Zealand)

DEUREX® EO Series / DEUREX® EV 03:
EINECS (Europe) TSCA (USA) DSL (Canada) AICS (Australia)
METI (Japan) NZIoC (New-Zealand)

15.2. Chemical safety assessment
16. OTHER INFORMATION

List of all H and P phrases according to Regulation EC/1272/2008 dt. 16.12.2008:
H phrases: ---
P phrases: ---

Amendments to issue March 2015:
Chapter 1.2
Chapter 2.1
Chapter 2.2
Chapter 9
Chapter 13
Chapter 14
Chapter 15.1
Chapter 16

Restrictions:
This information relates only to the above class of products and need not be valid if used with another product or in any special process.
