

## DEUREX® H 9215 M

### TECHNICAL INFORMATION

<b>Chemical description:</b>	Micronized hybrid wax based on Polyethylene wax and Amide wax																																				
<b>Production process:</b>	Homogeneously melted wax hybrid, micronized by DEUREX® air classification																																				
<b>Benefits:</b>	<p>Hybrid waxes offer a variety of wax properties:</p> <ul style="list-style-type: none"> <li>- Contains short-chained polyethylene waxes to optimize adhesion and flexibility on the surface of the end product as well as UV resistance</li> <li>- Contains high-melting polyolefin waxes to increase the temperature resistance and hydrophilicity of the surface</li> <li>- Contains high-melting amide waxes to increase the temperature resistance but above all to improve the anti-blocking and free flowing properties, the degassing as well as to avoid the formation of agglomerates</li> </ul>																																				
<b>Applications:</b>	<p><u>Liquid coatings</u></p> <ul style="list-style-type: none"> <li>- Very good scratch resistance</li> <li>- Lowers the coefficient of friction (slip)</li> <li>- Improves abrasion resistance and minimizes metal markings</li> <li>- Soft touch and anti-blocking properties</li> </ul> <p><u>Printing inks</u></p> <ul style="list-style-type: none"> <li>- Slip and rub resistance</li> <li>- Anti-blocking properties</li> </ul> <p><u>Powder coatings</u></p> <ul style="list-style-type: none"> <li>- Very good degassing agent</li> <li>- Improves flowability of the powder</li> <li>- Provides slip and scratch resistance</li> </ul>																																				
<b>Properties:</b>	<ul style="list-style-type: none"> <li>- Excellent rub resistance after a short drying time</li> <li>- Less agglomerates in the product</li> <li>- Gloss-reducing properties in all coatings</li> </ul>																																				
<b>Processing:</b>	<ul style="list-style-type: none"> <li>- Economically beneficial due to the usage of less energy and lower temperatures in the production process</li> <li>- Reduction of manufacturing costs by quickly and effectively processing</li> </ul>
